Application
The RF-programmable ISOProx® II proximity access card offers proximity technology and photo identification on a single access control card.

Features
- Offers universal compatibility with all HID proximity readers.
- Provides an external number for easy identification and control.
- Custom pre-printed artwork available.
- Supports formats up to 85 bits, with over 137 billion codes.
- Meets ISO standards for thickness; use with all direct image or thermal transfer printers.
- Accepts either a horizontal or vertical slot punch.
- Using HID’s ProxProgrammer™, card vendors can ship graphics-quality proximity cards, custom programmed to their customers’ requirements, from their own inventory. Enables smaller order quantities and overnight delivery. (Check with vendor for availability.)
